1. The following is an examiner's statement of reasons for allowance: prior art of record fails to show or fairly suggest a bag carrier having the combination as claimed including a *locking lip* supported below the opening on an outer surface of the body portion, a *locking member* having a first end supported by the outer leg, a second end of the locking member engageable with the locking lip to lock the hook in a closed position, and a release member for releasing the locking member from the locking position. Patent to Schwalback (D268,815) is considered the closest prior art. However, '815 does not show a locking lip-to-locking member engagement. '815 also lacks a structure of an intended release member for releasing the locking member from the lip. Other prior art references (e.g. Russell 4,071,063, Bystrom et al. 5,651,575) show a locking lip-to-locking member engagement. To reach the invention as claimed, however, it requires a mass alteration and redesign of the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
